### PRODUCT DESCRIPTIONS

- Formulated to promote good root development when seeding or sodding.
- 50% of the nitrogen is derived from **ES-COTE™** polymer-coated, sulphur-coated urea. **ES-COTE™** slow-release nitrogen provides extended feeding.
- Corrects phosphorus deficiencies. Formulated with **Solu-Cal S™** which contains **CARBOXY™** organic acid. Contains 11% Calcium.
- All the potassium is derived from sulphate of potash, a safe and natural source of potassium and sulphur.

### PRODUCT BENEFITS

- The carboxylic acids (**CARBOXY™**) contained in this fertilizer promote root development and increase the plant's ability to absorb nutrients in the soil, even less mobile elements such as phosphorous and calcium.
- **ES-COTE™** slow-release fertilizer uses breakthrough technology to provide a unique coating that allows gradual and consistent nutrient release delivering up to 8 weeks of continuous feeding.
- Phosphorus plays a leading role in the development of roots during establishment.

## DIRECTIONS FOR USE

- Read the entire label before use. Apply only as directed.
- IMPORTANT: It is recommended to apply fertilizers in the early morning. Water in after application, especially during periods of high temperatures (28°C or above). Avoid applying fertilizer to drought-stressed turf. If turf is under drought stress, irrigate before fertilizer application.
- Irrigating after application will accelerate initial green-up and will aid in the movement of fertilizer granules into the turf canopy.
