

Liquid 00000 00000 -১১ல১

## Tree and Shrub - with N-Durance ${ }^{\circledR}$

## PRODUCT DESCRIPTION

- Liquid fertilizer for maintenance trees and shrubs.
- $50 \%$ of the nitrogen is derived from methylene urea
- 25\% derived from liquid slow-release nitrogen $N$-Durance ${ }^{\circledR}$.

## PRODUCT BENEFITS

- $\quad$-Durance ${ }^{\circledR}$ liquid nitrogen fertilizer contains a combination of TRIAZONE and methylene urea, a patented slow release nitrogen compound.
- Methylene urea slow release nitrogen is a trusted technology that has a gradual, consistent release and longevity that allows for the effective feeding of turfgrass with fewer applications for up to 12 to 16 weeks.
- TRIAZONE nitrogen means increased nitrogen absorption by plants to provide uniform growth and consistent colour intensity for 8 to 10 weeks.
- The slow release mechanism of $N$-Durance ${ }^{\circledR}$ minimizes the loss of nitrogen to the environment.

## PRODUCT CHARACTERISTICS

Product Code: LOO3214 (10 L), L003207 (Bulk)
Product Type: Liquid Fertilizer for Trees and Shrubs size: liquid

Format: 10 L, Bulk
density: 1.254 kg / L
Color: Green-Blue
GUARANTEED MINIMUM ANALYSIS ..... \%
Total Nitrogen (N) ..... 10.00
5.0\% Urea Nitrogen
5.0\% Other water soluble nitrogen*Phosphoric acid $\left(\mathrm{P}_{2} \mathrm{O}_{5}\right)$5.00
Soluble Potash ( $\mathrm{K}_{2} \mathrm{O}$ ) ..... 10.00

* 5.0\% Slowly available nitrogen from methylene urea

## INGREDIENTS

Urea, methylene urea, triazone, potassium hydroxide, phosphoric acid, acetic acid

## NDURANCE

## DILUTION RATE

- 10-5-10 in 1 liter of water to 9 liters.

## DIRECTIONS FOR USE

- Read the entire label before use. Apply only as directed.
- Apply only to dry foliage.
- IMPORTANT: It is recommended to apply fertilizers in the early morning. Irrigate after application, especially during periods of high temperatures ( $28^{\circ} \mathrm{C}$ or above). Avoid applying fertilizer to drought-stressed turf. If turf is under drought stress, irrigate before fertilizer application.
- Irragating after application will accelerate initial green-up and will aid in the movement of fertilizer granules into the turf canopy.
- Apply after mowing to prevent particle pick-up by mowing equipment. To further reduce particle pick, do not collect clippings for one mowing after application.

## Format

## PRECAUTIONS

 symptoms occur. Keep out of reach of animals.

Rev1603
