Overseeding Solution with Sustâne

PRODUCT DESCRIPTION

- All natural mixture including Sustâne and Solu-Cal S.
- 50% premium turfgrass seed by weight. Composed of 22% Kentucky bluegrass, 48% Perennial ryegrass and 30% Creeping red fescue.
- Contains 7.4% calcium.
- Formulated for overseeding established lawns, starting new lawns and repairing bare spots.

SUGGESTED APPLICATIONS

- **Bare Sport Repair or New Lawn:** Loosen the top 5 to 7.5 cm (2 to 3 inches) of soil and apply at a rate of 1.7 kg/100 m² (3.5 lb/1,000 ft²). Best results occur when area is then lightly rolled to help maintain soil moisture around new seedlings.
- **Overseeding:** Mow grass closely and then loosen the top 6 mm (1/4 inch) of soil in thin areas. Apply at a rate of 0.6 kg/100 m² (1.2 lb/1,000 ft²) using a broadcast spreader. Best results occur when a topdressing material is added over top of the overseeding mixture to help maintain moisture around new seedlings.

DIRECTIONS FOR USE

- Read the entire label before use. Apply only as directed.
- Apply only to dry foliage.
- **IMPORTANT:** It is recommended to apply fertilizers in the early morning. Irrigate after application, especially during periods of high temperatures (28°C or above). Avoid applying fertilizer to drought-stressed turf. If turf is under drought stress, irrigate before fertilizer application.
- Irrigating after application will accelerate initial green-up and will aid in the movement of fertilizer granules into the turf canopy.
- Apply after mowing to prevent particle pick-up by mowing equipment. To further reduce particle pick, do not collect clippings for one mowing after application.

Format

20 kg

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed. Do not inhale. The fertilizer may cause irritation of eyes, nose, throat and skin. In case of contact with eyes, rinse thoroughly with water and consult a physician if symptoms occur. Keep out of reach of animals.
