50% UFLEXX[™] + Solu-Cal

PRODUCT DESCRIPTIONS

- 50% of the nitrogen is derived from **UFLEXX™** stabilized nitrogen. Stabilized nitrogen technology is the solution to nitrogen loss, ensuring optimum fertilizer efficiency while being more environmentally responsible.
- 50% of the nitrogen is in a quick-release form from ammonium sulphate, which promotes quick green-up and recovery in the spring.
- Formulated with Solu-Cal S[™] which contains CARBOXY[™] organic acid.

PRODUCT BENEFITS

- UFLEXX[™] improves nitrogen efficiency, reduces nitrogen loss due to volatilization, leaching and denitrification. The result is an excellent nitrogen source with improved nitrogen efficiency, and an extended response of up to 6 - 8 weeks.
- The nitrogen from ammonium sulphate is one of the most responsive when soil temperatures are low.
- Ammonium sulphate and manganese have been proven to be effective in preventing patches diseases, including Summer Patch and Take-All Patch.
- The carboxylic acids (CARBOXY[™]) contained in this fertilizer promote root development and increase the plant's ability to absorb nutrients in the soil, even less mobile elements such as calcium.

DIRECTIONS FOR USE

- Read the entire label before use. Apply only as directed.
- IMPORTANT: It is recommended to apply fertilizers in the early morning. Water in after application, especially during periods of high temperatures (28°C or above). Avoid applying fertilizer to drought-stressed turf. If turf is under drought stress, water before fertilizer application.
- Watering in after application will accelerate initial green-up . and will aid in the movement of fertilizer granules into the turf canopy.
